

! IMPORTANT !

Important info's for radio installation

Please read carefully and note!#

- Despite careful testing of our Radio installation kits and panels we ask **BEFORE** you off / installation of radio sets to check whether radio aperture shape and size cable adapter matches the verbautem in your car radio.
- The radio installation kit is supplied in some cases for several models of the car manufacturer to fit, so it may be the power supply (+ / -) lead to different pin assignments of the connector. This may need to be repositioned accordingly. **For this purpose, please see the instruction manual of the radio (wiring diagram) and in the current plan of your vehicle.**
- Possibly exposed power cable to the adapter cable installation kits are for the power supply and must be individually adjusted / inserted in her vehicle model / plug. This is **NORMAL** for newer vehicle models. Please check this in the manual of the radio (wiring diagram) and in the current plan of your vehicle.

For vehicles without terminal 15 cable (ignition plus), or with Can-bus terminal 15 (simulated) in the radio slot, it must be connected by a consumer in the vehicle to the new radio / cable (eg from ventilation, air conditioning or cigarette lighter).

Note further that, ect Current radio models from Kenwood, JVC, Pioneer. 2 x power supply (+) and need some car models, only 1 power supply (+) is applied at the factory. If for example. but only the radio drive humming the display does not display anything, it is precisely this lack of power supply.

- If they have (especially to recent vehicle models) never conducted such a radio installation, or you are unsure as regards the connection of the supplied goods, we advise you to install a car radio specialist to be carried out on site so you do not damage possibly caused by incorrect connection. Please understand that we can not give instructions for the installation on the phone or by email.
- If you have purchased a steering wheel control adapter with you read this please our extra info sheet.
- **CAUTION: If you install the kit in a workshop that will allow say you need additional adapters, please call us BEFORE!**
- *You have questions about the unit content, or delivery of the wrong, then they will call us. Her - www.MediaDox.de – Team*
